EASEMENTS
As per Restrictions of Viking Valley Association

No porch or projection of any building or septic system shall extend nearer than twenty-five (25) feet from any road right-of-way, nor nearer than ten (10) feet from the side property line; nor nearer than twenty (20) feet from the rear line of any lot; nor within fifty (50) feet from the normal water line as indicated on Plat for the Subdivision without written permission of the Association. All conditions of the Zoning Regulations of Daviess County, Missouri, if any, must be complied with provided that when and/if such Zoning Regulations impose different restrictions than this Declaration, whichever imposes the more restrictive or imposes the higher standards shall control.

It's the responsibility of the property owner to clearly and accurately define {stake} and maintain during construction the property boundaries, so the Building Committee can assure compliance to the building regulations.

The corner shore boundaries must be marked when putting in docks, and side property lines for shelters and sheds are necessary.

A legal survey must be included with all building application for residential houses on residential lots and structures on commercial lots.

Lot Owner/or Applicant

BUILDING RULES & REGULATIONS

All building plans must be approved by the Building Committee prior to the start of construction and must comply with the Covenants and Restrictions as well as the existing building regulations in effect at time of the building permit submission. **IF CONSTRUCTION IS STARTED BEFORE THE BUILDING COMMITTEE HAS APPROVED THE REQUEST AND ISSUED A PERMIT THE JOB IN QUESTION WILL BE STOPPED AND AN INFRACTION TICKET WILL BE ISSUED BY SAFETY PATROL. ANY UNAPPROVED CHANGE OF A BUILDING PERMIT WILL BE SUBJECT TO A TICKET AND FINE.** This is the responsibility of the property owner as well as the contractor.

Drain Tubes

When a drainage issue requires the installation of a drain tube the following specific rules must be followed.

A Building Permit is required prior to the placement of any drainage tube that will direct water from streets and lots. The building permit will need to contain the following:

1. Documentation of the need for altering the natural waterflow.
2. A stake survey marking the corners of the lot.
3. An engineer's recommendation of the proper size of tube to carry the projected waterflow.
4. Contractor's name, address, and phone number.

A drainage tube may be placed in a VVA easement with proper approval. The tube must be of adequate size to handle the waterflow. It must be a minimum of 18 inches below the surface. The drainage inlet must be covered with a metal mesh screen that can be cleaned.

All responsibility for a drainage tube rests with the lot owner.

1. The lot owner assumes all costs. VVA will not install private drain tubes.
2. The lot owner bears all financial responsibility for any damage to surrounding properties should the tube get plugged and causes water damage to others.

A deed restriction will be placed on the title of any lot that installs a drainage tube into a VVA easement so that any future owners of said lot will continue to bear the financial responsibility for any damages resulting from the installed tube. A deed restriction can be removed by removing the drain pipe and restoring the VVA easement.
